UNION TOOL CLUB DROPS TO SECOND PLACE

The Pacific Sash and Door baseball team put the skids under the U. T. aggregation last Saturday and the latter dropped into second place in the pennant race in the Industrial league.  
The pitching staff of the U. T. team was off his feed and amazed the spectators in the first inning by giving free tickets to three batters,—and with two down,—Arnold the same old Red who once played on our team, evidently had a grudge kicked one out for three sacks of course, scoring the three men who were ahead of him. Red's hit seemed to rattle the U. T. boys a little, because right away a couple of booted balls on a couple of scratch infield grounders allowed another run.  
A terrible lead,—four runs at the end of the first,—and while Sweet settled down and pitched his usual superb game, two hits and a couple more errors permitted three more scores, a total of seven against the U. T. one lonely little run. At any rate the team and crowd was happy it was not a shut-out.  
Colby, hurling for the Pacific Sash and Door team, played a beautiful game, and in our judgment to him should go the credit for the defeat of the local team, although for a second division team we must say that his support was high grade. Colby kept the three hits the local boys got well scattered, and only through an error did Wolfe safely cross the pan with our one long run.  
Next Saturday's game should be a regular one, as the league leaders will come to Torrance.

Mrs. Geod. Woodside was a week end guest of Mr. and Mrs. J. S. Tolson, at Huntington Park.

New Telephone Building Has 2 Store Rooms

The new building being erected on Weston street for Harold C. Dewey, of Ontario, will be ready for occupancy about the last of July. The building, a two-store, one story structure of brick, with a cement brick front and large plate glass windows. The room near Narbonne avenue will be occupied by the Telephone company, and the building is being so constructed as to admit the cables from underground rather than from overhead. The stores will be 40x48, thus affording one more good location for a live wire.
